POWER BI PROJECT

Fitness & Wellness Coaching Dashboard

Turning 20,000 sales transactions into clear decisions for coaches and business owners

Project Goal and KPIs

Coaching businesses often decide by guesswork. This dashboard gives head coaches and owners one place to track revenue, programs and regions.

Total Revenue

Sum of all completed transactions over the selected period

Average Order Value

Total revenue divided by the number of transactions

Transaction Volume

Count of client coaching transactions processed

Data and Validation

20,000

synthetic transactions generated with a custom Python script, with realistic dates, programs, regions and conversion statuses

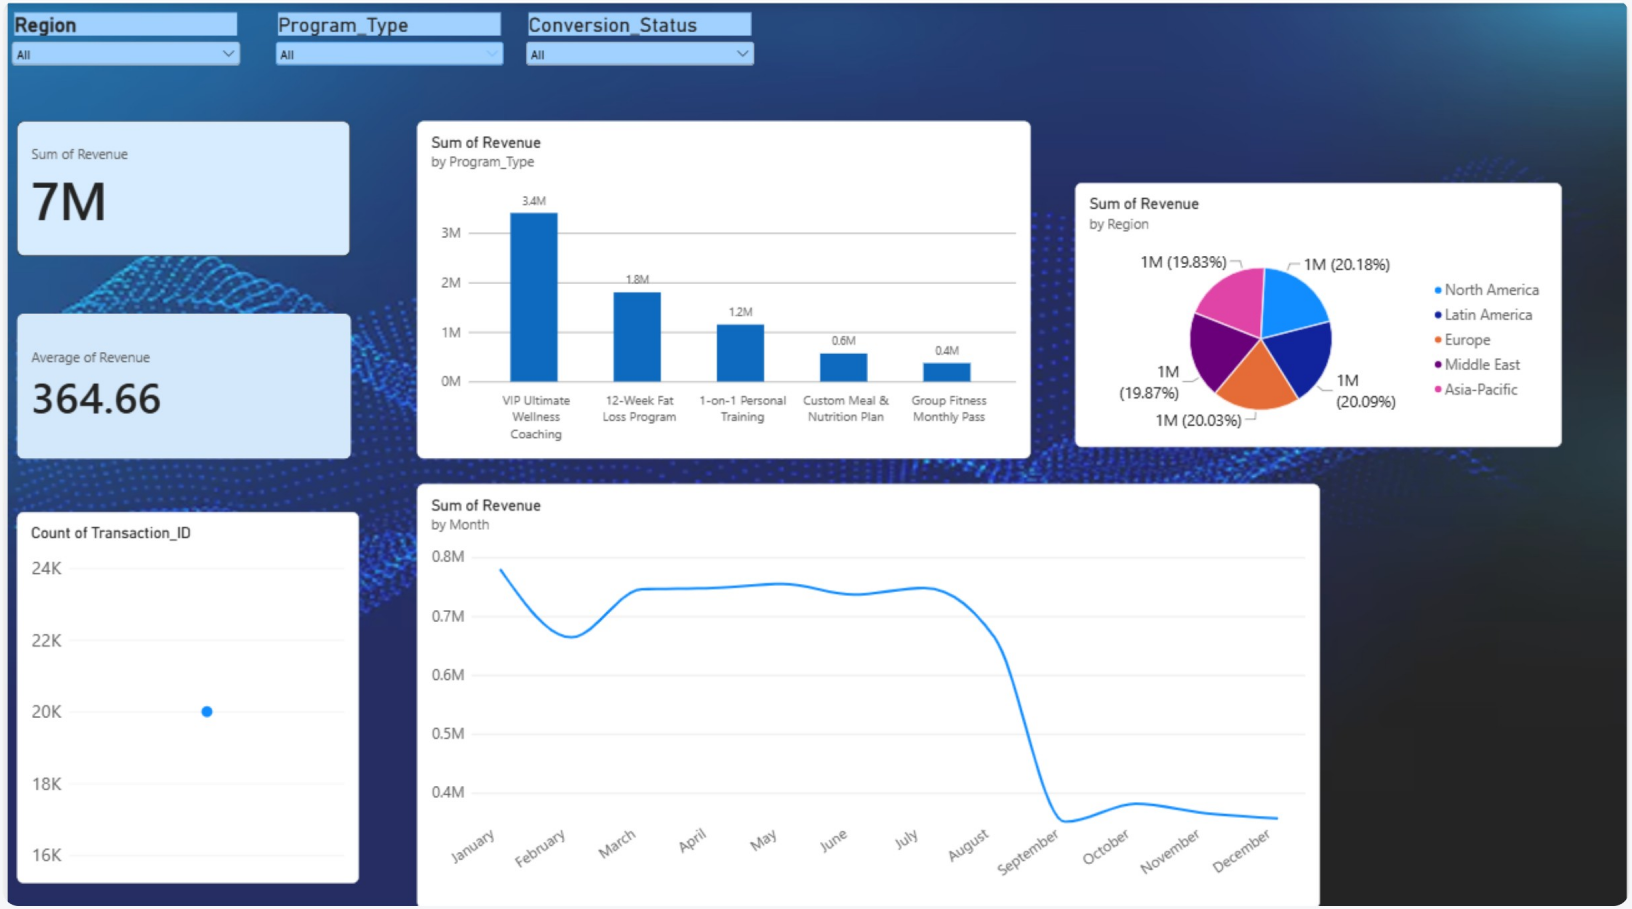

100%

valid rows in the Power Query check, with no errors or empty values distorting the totals

3

slicers (Region, Program Type, Conversion Status) tested to cross-filter every visual correctly

The Dashboard

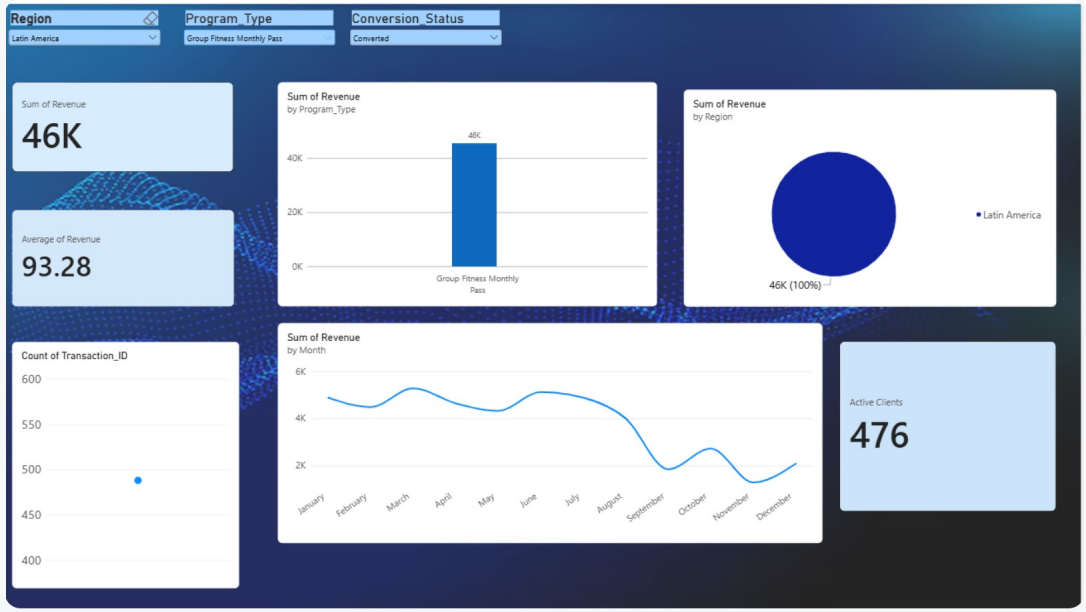

KPI cards: revenue, average order value, active clients

Bar chart: revenue by program

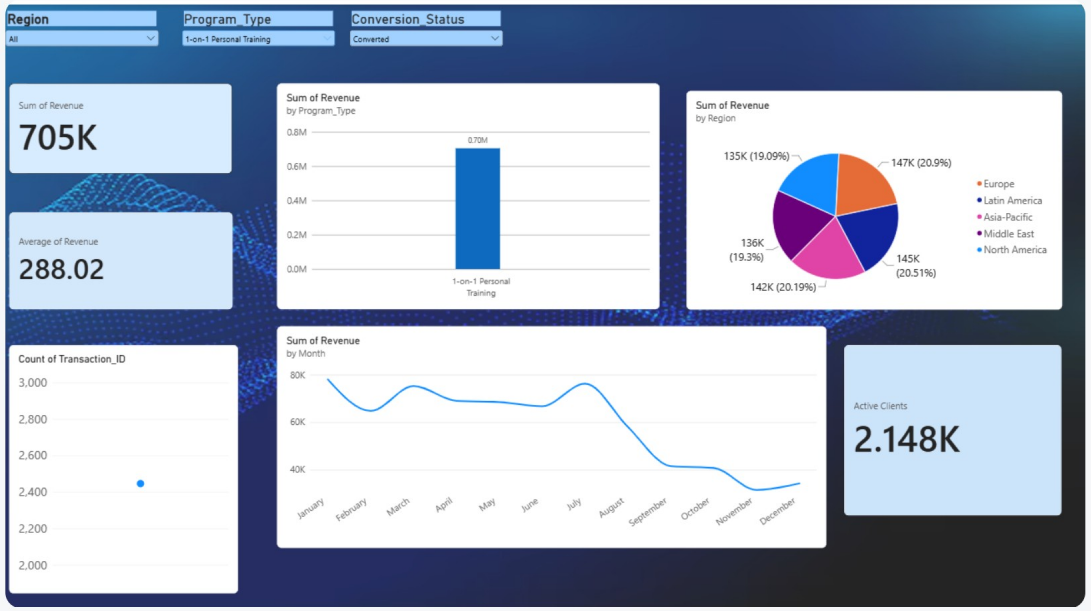

Pie chart: revenue by region

Line chart: revenue by month

Interactive Filtering

Latin America, Group Fitness Pass, Converted: 46K revenue from 476 active clients

All regions, 1-on-1 Training, Converted: 705K revenue from 2,148 active clients

Key Insights and Next Steps

What the data shows

- Total revenue is about 7M across 20K transactions, with an average order of 364.66
- VIP Ultimate Wellness Coaching leads at 3.4M, nearly half of all revenue
- Each of the five regions contributes about 20%, so the market is balanced
- Monthly revenue holds near 0.75M until August, then falls to about 0.35M

What to improve

- Investigate the late-year revenue drop and plan promotions for it
- Track repeat purchases to measure retention
- Add acquisition cost to calculate return on ad spend per channel
- Connect live CRM data with alerts for conversion drops
